## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

## **Listing of Claims:**

- 1. (previously presented) In a distributed network, a method for automatically synchronizing each of a set of distributed multimedia assets, comprising:
- (a) modifying a particular one of the set of distributed multimedia assets; and
- (b) automatically synchronizing all others of the set of distributed multimedia assets based upon (a).
- 2. (original) A method as recited in claim 1, further comprising:
  - (c) generating an update edit list corresponding to (a).
- 3. (original) A method as recited in claim 2, wherein the automatically synchronizing comprises:
- (d) forwarding the update edit list to the others of the set of distributed multimedia assets; and
- (e) modifying each of the others of the set of distributed multimedia assets based upon the forwarded update edit list.
- 4. (original) A method as recited in claim 1, further comprising:
- (f) generating a resultant multimedia asset corresponding to (a), wherein the resultant multimedia asset is formed of a digital negative of the particular one of the set of multimedia assets and a corresponding edit list, wherein the edit list represents all modifications made to the digital negative.
- 5. (original) A method as recited in claim 4, wherein the automatically synchronizing comprises:
- (g) replacing each of the others of the set of distributed multimedia assets with the resultant multimedia asset.

- 6. (original) A method as recited in claim 1, wherein the multimedia asset is a digital image.
- 7. (original) A method as recited in claim 6, wherein the digital image is one of a plurality of associated digital images.
- 8. (original) A method as recited in claim 7, wherein the plurality of associated digital images take the form of an album.
- 9. (original) A method as recited in claim 1, wherein the edit list is one of a number of edit lists included in a catalog file.
- 10. (original) A method as recited in claim 9, where each of the number of edit lists included in the catalog file are associated with a particular multimedia asset.
- 11. (previously presented) In a distributed network, an apparatus for automatically synchronizing each of a set of distributed multimedia assets, comprising:
- a first means for modifying a particular one of the set of distributed multimedia assets; and
- a second means for automatically synchronizing others of the set of distributed multimedia assets based upon the modifying of the first means.
- 12. (previously presented) In a distributed network, an apparatus as recited in claim 11, further comprising:
- a third means for generating an update edit list based upon the modifying of the first means.
- 13. (original) In a distributed network, an apparatus as recited in claim 12, wherein the automatically synchronizing comprises:
- a fourth means coupled to the third means for forwarding the update edit list to the others of the set of distributed multimedia assets; and

a fifth means coupled to the fourth means for modifying each of the others of the set of distributed multimedia assets based upon the forwarded update edit list.

14. (original) In a distributed network, an apparatus as recited in claim 11, further comprising:

a sixth means coupled to the first means for generating a resultant image corresponding to the modified multimedia asset wherein the resultant image is formed of a digital negative of the particular one of the set of multimedia assets and a corresponding full edit list, wherein the full edit list represents all modifications made to the digital negative.

15. (original) In a distributed network, an apparatus as recited in claim 12, wherein the automatically synchronizing comprises:

a seventh means coupled to the first means for replacing each of the others of the set of distributed multimedia assets with the resultant image.

- 16. (original) In a distributed network, an apparatus as recited in claim 12, wherein the multimedia asset is a digital image.
- 17. (original) In a distributed network, an apparatus as recited in claim 16, wherein the digital image is one of a plurality of associated digital images.
- 18. (original) In a distributed network, an apparatus as recited in claim 17, wherein the plurality of associated digital images take the form of an album.
  - 19. Cancelled
  - 20. Cancelled
